

Southern Livestock Adaptation **2030**

Russell Pattinson Program Overview

Director, Miracle Dog Pty Ltd
National Coordinator, SLA 2030

Focus

Southern Livestock Adaptation 2030

- What might happen in the future
- What can we do about it?

Southern Livestock Adaptation 2030

Today

1. Research – Uni Melb, CSIRO, TIA (refine models, pastures, dairy, 2030, 2050, 2070)
2. Outcomes of local modelling and producer discussions (sheep & cattle, 2030)
3. So what?

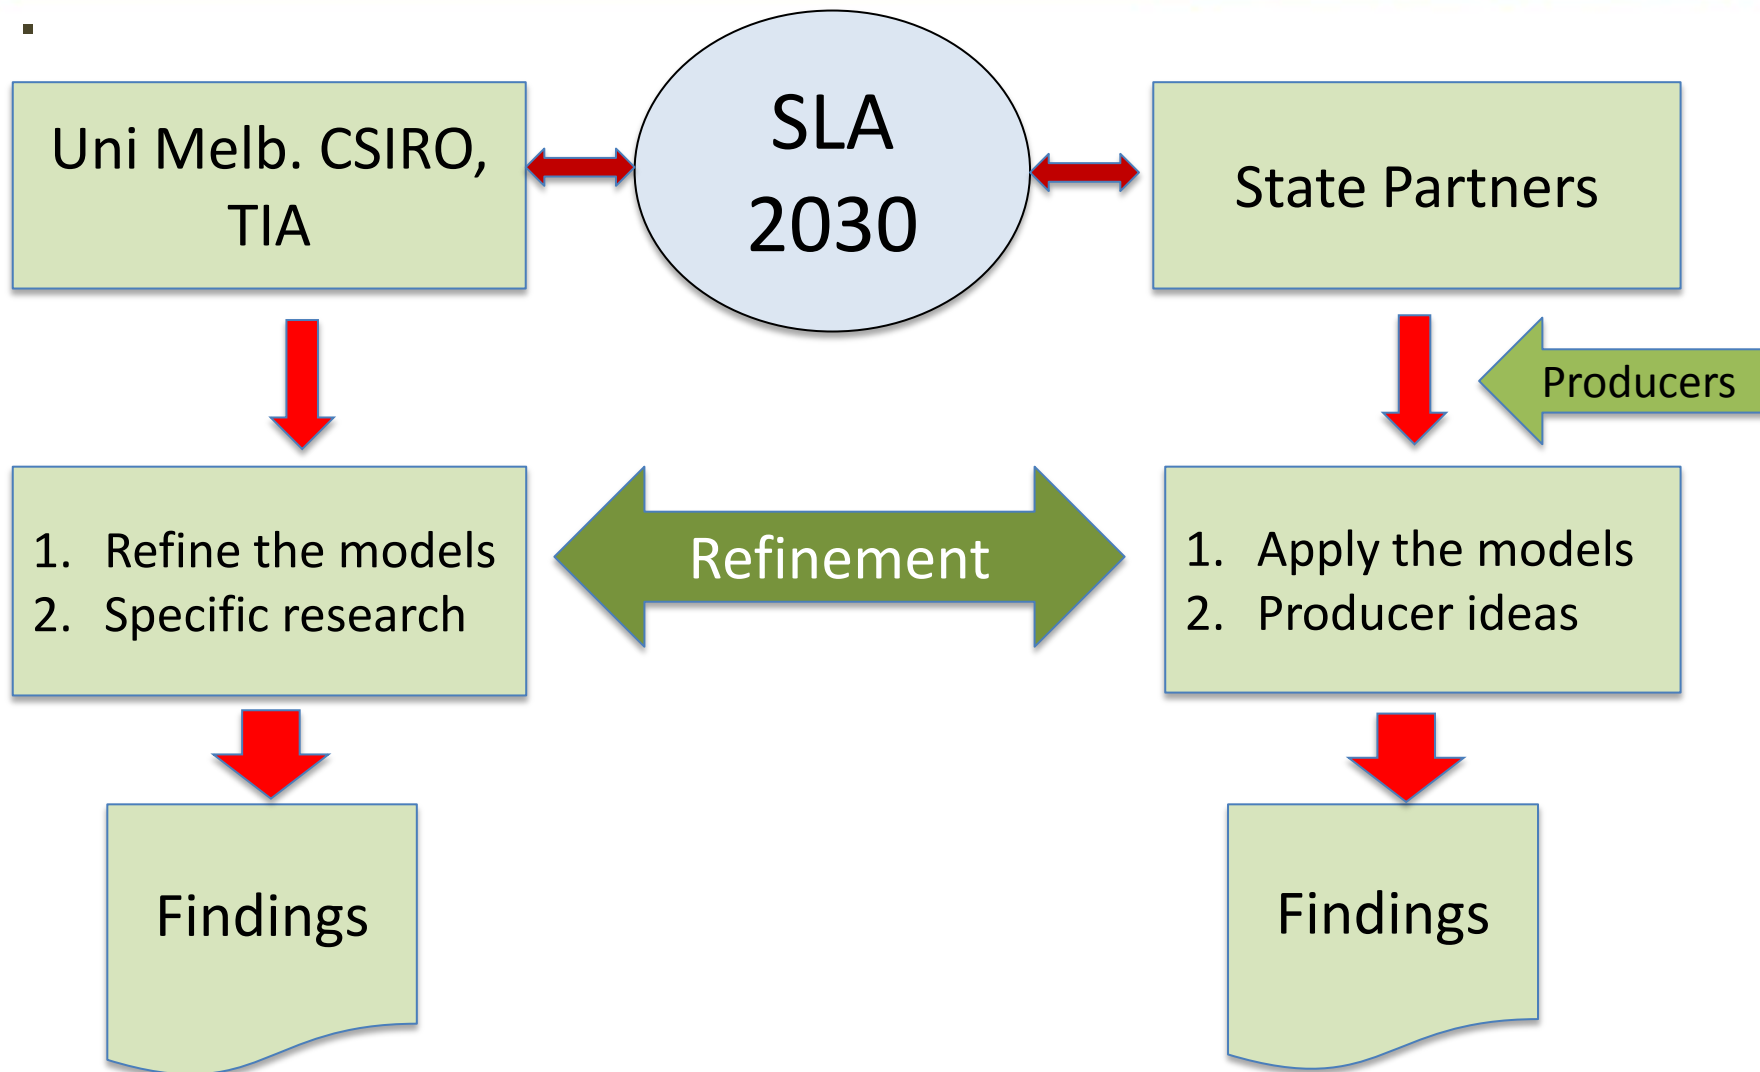

Southern Livestock Adaptation 2030

Partners

Southern Livestock Adaptation 2030

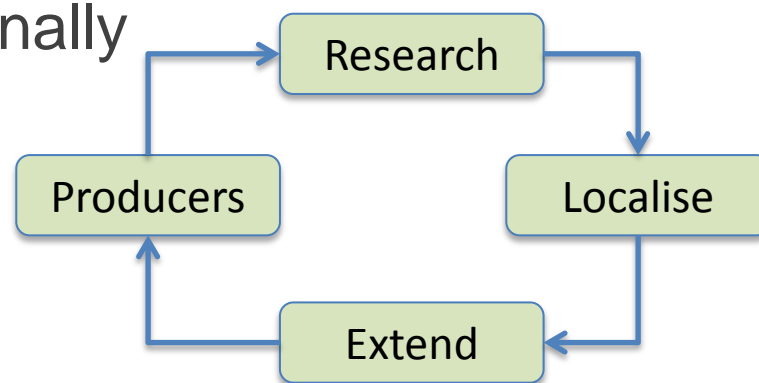

Southern Livestock Adaptation 2030

Why?

- Potential impacts & possible adaptations - local level
- Remove some uncertainty about CC impacts
- Engage with producers – “my back yard”
- 10,000 livestock producers more aware
- Improve the models – “on-ground” feedback
- Increase modelling skills regionally
- Innovative approach

Southern Livestock Adaptation 2030

Where?

Southern Livestock Adaptation 2030

Target audiences

1. Producers – directly involved
2. Other producers
3. Extension providers
4. Service organisations
5. Researchers – scientific papers
6. Policy makers

Southern Livestock Adaptation 2030

What have we got to say?

- **Information we have never had before**
 - **Local impacts, adaptations, challenges**
- 80 locations
- Workshops at 46 towns
- 2,000 producers directly involved
- 10,000+ producers “aware” of results
- 17 peer reviewed papers, one book chapter and dozens conference papers
